

DAVID ASEKOMHE (Eng, CRSP, CSP, IOSH, PMP, PRINCE2)

My name is David Asekomhe, an engineer, a safety enthusiast, an agent of change and a visible minority.

I have a bachelor's degree in chemical engineering with chemistry and master's degree in corrosion control engineering and Environmental Engineering from the University of Manchester, England, UK.

I am a practising safety executive with over 15+ years professional experience and certifications in CRSP, CSP and IOSH.

I started my career with Exxon Mobil and worked in various other companies in the UK. In my last company in UK, I was a senior project manager and a board member for Scott Bader LTD and Scott Bader Community Fund Trustee Limited.

I moved to Calgary, Canada in 2013 and worked with ACM facility Safety Inc. I started my career in ACM as a senior Engineer and rose to the position of Senior Vice President in my 8 years with the organization.

I currently work for Davont Inc. and RskLess Inc. in Calgary as president of the organisation. My role as president is to ensure that the organization is profitable while making the world safer than yesterday with our solutions and services.

Outside of work, I volunteer in various charity organizations and non-governmental bodies. I am currently the president of Skyview Landing Condo Corporation, President of Etsako Association of Calgary (Local Association) and also the president of my Alma Mater Association in Canada.

My professional background and volunteer experience has equipped me with the skills needed to be an effective leader and collaborator. I am confident that my relevant skills and qualities would serve our association well and help us achieve our goals.

Thank you for considering my candidacy for Secretary of ASHSP. I am excited about the opportunity to serve our association and look forward to discussing my qualifications with you further.
